

HEARTHWOOD
FLOORS WITH DEEP ROOTS

HearthwoodFloors.com

FOUR GENERATIONS OF AMERICAN MADE HARDWOOD.

Hearthwood is rooted in a 70 year family tradition of manufacturing engineered wood flooring – a product invented by first-generation founder Andy Anderson in 1938. We believe in manufacturing our wood flooring in the United States. It's a commitment we've made to our employees and customers for over 70 years. Our vision is to make quality hardwood floors from 100% American raw materials – made by Americans and used in American homes and businesses.

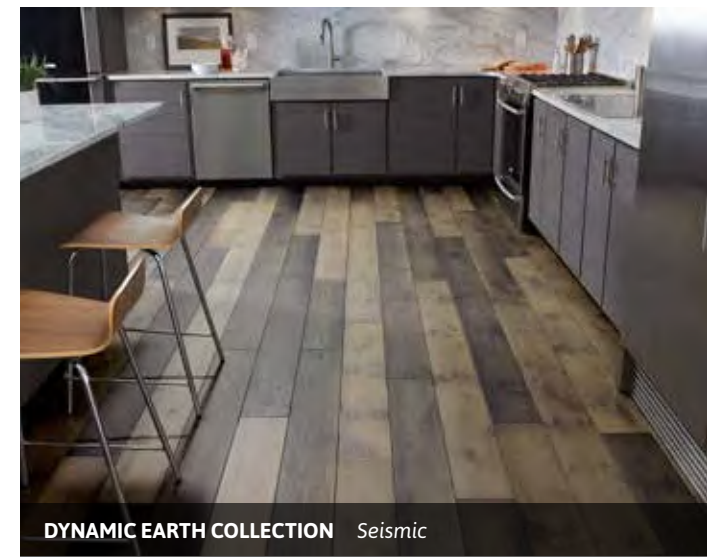

All scraped styles are sculpted truly by hand for an authentic look.

APPALICIAN SPRING COLLECTION *Harvest Hymns*

All our flooring is made from 100% American hardwood.

DYNAMIC EARTH COLLECTION *Seismic*

CONTROLLED CHAOS COLLECTION *Inertia*

Coated with Wetworx 6S™ finish to protect against spills

INSPIRED BY NATURE

- Every plank is natural and completely unique for a floor that adds warmth and value to your home
- A fresh, diverse collection featuring a variety of styles and colors ranging from traditional to contemporary.
- Reclaimed texture and hand highlighting creates the look of antique floors
- Scraped textures are hand crafted in a modern new style to create color movement and texture without a dated *channeled* look.
- 100% American hardwood construction: 5 ply engineered with White Oak, Hickory and Maple wear layers.
- Dynamic color shifts in some collections mimic look of reactive and thermally treated wood, but are achieved using low-emitting, water-based stains for products that are healthy and consistent from run to run.
- The long board length reduces the number of seams and creates clean lines and a high-end look.

EXCELLENCE IN MANUFACTURING

- From assembly to packaging, we make everything in our plant just outside of Nashville, TN.
- Pressing in house for maximum control over quality and performance.
- Use all-hardwood construction and oak backers for optimal dimensional stability in large format planks.
- Precision milling makes planks install quickly and easily - up to 5 square feet per plank!
- Complex designs are achieved through multiple steps in production and are truly crafted by hand so no two boards are alike
- State-of-the-art manufacturing plant features the longest finishing line in the world.

MADE IN
TENNESSEE

PREMIUM PERFORMANCE

- All products are coated in our patented Wetworx 6S™ Finish to offer exceptional resistance to spills and easy maintenance.
- Wetworx 6S™ Finish is reinforced with aluminum oxide particles offering exceptional protection against scratches/wear from foot traffic, pets and children.
- Wetworx 6S™ Finish ensures that floors can be wet mopped with approved wet cleaning systems that are readily available.
- Precision milling makes installation simple and versatile; planks can be glued, stapled or floated.

FOCUSED ON RESPONSIBILITY

- 100% made in the USA from American hardwood.
- Partner with NWWFA and the Gary Sinise RISE program providing wood flooring for smart homes awarded to our country's severely wounded heroes.
- Manufactured inside a Tennessee state prison using paid voluntary offender labor as part of a program that reduces recidivism by 40%.
- CARB Certified and Indoor Advantage Gold certified for healthy indoor air quality.

APPALACHIAN SPRING COLLECTION

HearthwoodFloors.com

Inspired by the reclaimed wood found in textile mills across the southeast, our **Appalachian Spring Collection** of white oak flooring combines varied saw blade textures and subtle color highlighting. The result is a harmonious blend between modern design and the authentic characteristics of wood that has been worn over time.

CONSTRUCTION	Sliced Face Engineered

DYNAMIC EARTH COLLECTION

HearthwoodFloors.com

Mother Nature is a powerful artist, and the stunning looks in our **Dynamic Earth Collection** pay homage to the awe-inspiring effects of her work. Wide planks showcase natural oak character and the bold color shifts create movement across the floor. Combining modern tones with authentic hardwood creates a versatile foundation for design and provides practical camouflage for active environments.

CONTROLLED CHAOS COLLECTION

HearthwoodFloors.com

Controlled chaos has become the signature of modern times, but is also what makes life so interesting. The dramatic color shifts across planks in our **Controlled Chaos Collection** mirror the work of chemically reactive stains, but are done with our standard, low-emitting finishes for a healthy and more predictable process. The lightly brushed texture and modern palette create a versatile foundation to energize a variety of design styles.

CONSTRUCTION	Sliced Face Engineered
