Dogwood® DENSIFIED HARDWOOD *pro*

PHOTO: Unparalleled Natural, Yellow Birch, BRDG63EB84W

They Were Born To Play, Our Floors Were Meant To Take It!

The toughest hardwood floor ever made. Now watching pets and kids roughhouse on your floor is no longer cringe-worthy.

Our revolutionary technology uses heat and pressure to transform 100% real wood into the most durable hardwood floors you'll ever live with. What takes nature millions of years to do, we can do in a matter of minutes. By harnessing the basic properties of heat and pressure, densified wood achieves extraordinary results and best of all it's completely natural.

It's a totally new category of flooring and stands alone as the first of its kind.

*See warranty for details.

The Dogwood Pro Advantage

Without the use of fillers, our patented technology is used to create a revolutionary hardwood floor that is **100% real hardwood** while being **6X more dent resistant** and **4X more scratch resistant** than typical hardwood.

**100% Real
Hardwood**

**6X More Dent
Resistance**

**4X More Scratch
Resistance**

Waterproof*

**Inhibits the Growth
of Bacteria**

MADE IN THE USA
with global and domestic components.

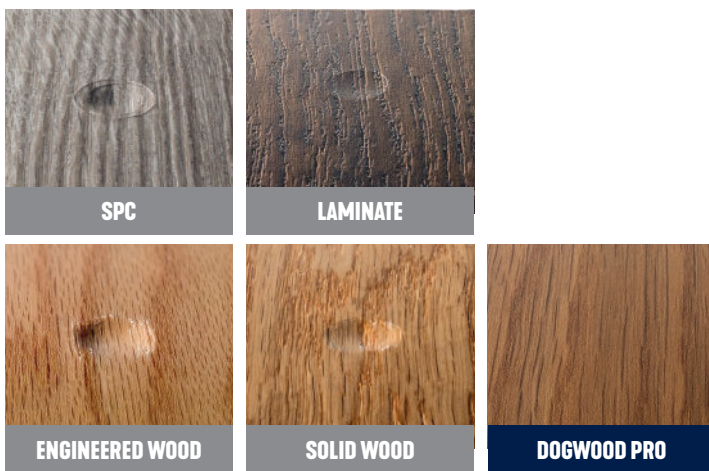

The Dogwood Pro Advantage

Scratch and dent damage caused by dogs is a leading reason why homeowners think they can't have hardwood floors. Dogwood Pro densified wood now enables families to enjoy the benefits of hardwood floors without the worry.

#1 IN DENT RESISTANCE

When tested for indentation resistance by ASTM D2394, a 2" weighted metal ball is dropped from a 60" height and indent levels are measured - Dogwood Pro performed best!

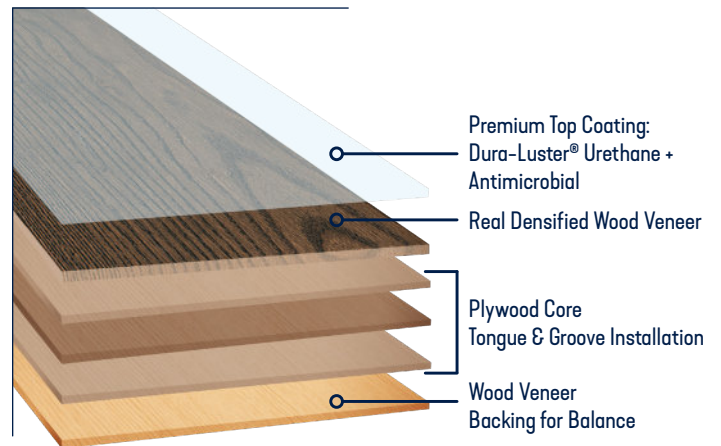

DOG SCRATCH TEST

Dogwood has equivalent performance as SPC and Laminate along with being superior to Traditional Solid and Traditional Engineered Wood.

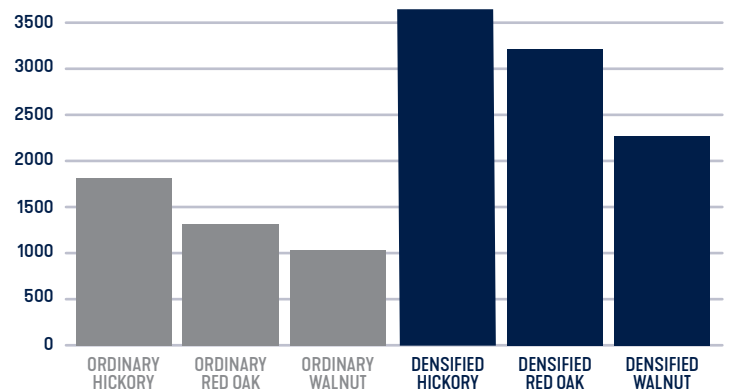

INSIDE DOGWOOD PRO

Our patent pending process uses simply heat and pressure to close the open cells in hardwood and densifies the wood making it the hardest flooring on the market.

JANKA HARDNESS OF DENSIFIED VS. ORDINARY HARDWOOD
